

Medical-Related Conferences And Trade Shows In 2018

Medical equipment represents a distinct set of applications for ac-dc power supplies, battery chargers and other power supply types. These industrial-grade power converters must meet special safety requirements such as those spelled out in IEC 60601-1.

Industry conferences and tradeshow devoted to medical technology present special opportunities for power supply vendors to market products specifically developed for these applications. Conversely, for designers of medical equipment and systems, these events may offer opportunities to learn about the latest power supply products and interact with vendors. This list of selected conferences and tradeshow identifies some of the events in 2018 where suppliers and users of power supplies for medical applications may meet.
