System Combines Multiple Instruments And Software For Designing And Measuring Power Systems

[Ridley Engineering's](#) RidleyBox combines a lifetime license for RidleyWorks Design Software, a four-channel frequency response analyzer, a four-channel 200-MHz oscilloscope, a Ridley Universal Injector, and an Intel computer—all in one product (see the figure). "This began as a concept to condense our labs for travel and teaching. The resulting product is one from which the entire power electronics community can benefit," commented Ridley. For more, see the [website](#) or contact Denise Ridley at 805-504-2212.

Figure. The RidleyBox combines a four-channel frequency response analyzer, a four-channel 200-MHz oscilloscope, a Ridley Universal Injector, and an Intel computer. A lifetime license for RidleyWorks Design Software is also included with this product.
