

PCIM Europe 2021 Will Go Digital

At the beginning of February, the decision was made to postpone <u>PCIM Europe</u> to late summer following talks with exhibitors and partners. In light of the ongoing pandemic and challenging situation, numerous industry players have been hesitant to commit to an on-site event. For this reason, Mesago Messe Frankfurt GmbH has decided to hold a digital-only event.

With the "PCIM Europe digital days", an online format will be offered to the power electronics community enabling networking and knowledge transfer from May 3 – 7, 2021.

Over five days, suppliers and users in the industry can receive information on key developments and connect in a variety of ways. In addition to extensive exhibitor profiles, the conference program will consist of outstanding presentations as a mix of live and video-on-demand presentations, followed by discussions with the speakers.

Conference topics include the latest trends in power electronics, developments in power semiconductors, passive components, products for thermal management, energy storage, sensors, new materials and systems. Please note that the conference will be held in English.

The world's leading exhibition and conference for power electronics and its applications will take place again in the regular, in-person format in Nuremberg in May 2022.

Further information will be available shortly at <u>pcim-europe.com</u>.

About Mesago Messe Frankfurt

Mesago, founded in 1982 and located in Stuttgart, Germany, specializes in exhibitions and conferences on various topics of technology. The company belongs to the Messe Frankfurt Group. Mesago operates internationally and is not tied to a specific venue. With 160 members of staff Mesago organizes events for the benefit of more than 3,300 exhibitors and over 110,000 trade visitors, conference delegates and speakers from all over the world. Numerous trade associations, publishing houses, scientific institutes and universities work with Mesago closely as advisers, co-organizers and partners.
