

ISSUE: [April 2026](#)

Join The Global Design Engineering Community At Sensors Converge

[Sensors Converge](#) is North America's leading event where sensing, processing, connectivity, power, and AI at the edge converge to accelerate innovation. Explore 200+ exhibitors, thousands of technologies across 50+ product categories, and expert-led sessions shaping the future of intelligent systems. The next edition of Sensors Converge will be held May 5–7, 2026 in Santa Clara, California.

If you're building next-generation products in IoT, edge AI, embedded systems, or connected devices—this is where breakthroughs move from concept to deployment.

Use our code **HOW100** for \$100 off VIP or conference passes—or grab a free expo hall pass. Click [here](#) to register for Sensors Converge.
