Coiltech Is North America's Coilwinding Hub

On June 10-12, 2026, members of the coilwinding industry will gather at [Coiltech North America 2026](#) in Novi, Michigan. Participants will be engineering professionals and technical specialists who design, manufacture, and operate electrical machines—from raw materials to finished machines, and everything in between. This is a focused, specialised trade fair that wastes neither time nor attention, where materials, processes, and systems meet. The event will be held at the Vibe Credit Union Showplace.

An integral part of Coiltech North America 2026 is the World Magnetic Conference (WMC), which will be held side by side with ITEC 2026, the IEEE's premier conference on transportation electrification. Together, WMC and ITEC 2026 offer a comprehensive platform for exchanging ideas, innovations, and solutions between academia and industry. For a list of WMC topics, click [here](#). For more on ITEC, see the IEEE Transportation Electrification Conference & Expo + IEEE Electric Aircraft Technologies Symposium [website](#).

Coiltech is about systems, interfaces, and services considered together—as they are designed, tested, and brought into use. Conversations at Coiltech start where certainty ends, and continue as working exchanges that shape what comes next.

With 280+ exhibitors from over 50 countries and visitors from over 60 countries, Coiltech now serves as the central place to exchange, align, and advance. For a list of participating companies, explore the [exhibitor list](#).

Coming to Coiltech, ideas take off on the ride in. The event offers an airport shuttle that is exclusively reserved for exhibitors' staff and preregistered visitors, free of charge. (Note that advance booking was required no later than March 20.) Attendees travel from the Detroit airport to the show floor in about one hour.

At the epicenter of the greater Detroit industrial ecosystem, Novi offers direct access to North America's leading hubs in energy, manufacturing, automotive, and aerospace. Nearby Detroit International Airport provides nearly 1,000 direct flights daily, making the event easily accessible from across the U.S., and beyond.

At Coiltech, logistics aren't left to chance—they're part of the experience.

- Free, gate-free parking means you walk in without delay.
- Free food & beverages all day keep you on-site, in the conversation.
- The DTW airport shuttle runs every half hour. Registration is required as noted above.
